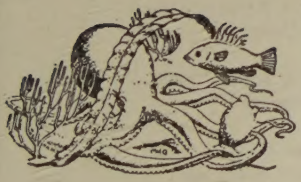
Journal of Marine Research

VOLUME 31, NUMBERS 1–3



Founded by Albert Eide Parr in 1937 and published
by the Sears Foundation for Marine Research

Yale University

Issued 1973, New Haven, Conn., U.S.A.

EDITOR

YNGVE H. OLSEN
Room 129, OML, Yale University
New Haven, Conn. 06520

ADVISORY COMMITTEE

VAUGHAN T. BOWEN
Woods Hole Oceanographic Institution

DANIEL MERRIMAN, Director
Sears Foundation for Marine Research
Yale University

R. B. MONTGOMERY
The Johns Hopkins University

ALLAN R. ROBINSON
Harvard University

BOARD OF EDITORS

ROBERT S. ARTHUR
Scripps Institution of Oceanography

RICHARD A. BARKLEY
National Marine Fisheries Service

VAUGHAN T. BOWEN
Woods Hole Oceanographic Institution

JAMES H. CARPENTER
University of Miami

CHARLES L. DRAKE
Dartmouth College

E. D. GOLDBERG
Scripps Institution of Oceanography

GORDON W. GROVES
University of Hawaii

WILLARD D. HARTMAN
Yale University

CEDRIC R. MANN
Bedford Institute of Oceanography

R. B. MONTGOMERY
The Johns Hopkins University

ROBERT G. PAQUETTE
Naval Postgraduate School

M. N. A. PETERSON
Scripps Institution of Oceanography

GEORGE W. PLATZMAN
The University of Chicago

MAURICE RATTRAY, JR.
University of Washington

ROBERT O. REID
Texas A & M University

WILLIAM S. RICHARDSON
Nova University

ALLAN R. ROBINSON
Harvard University

RUSSELL L. SNYDER
Nova University

TJ. H. VAN ANDEL
Oregon State University

GEORGE VERONIS
Yale University

WARREN S. WOOSTER
University of Miami

CHARLES S. YENTSCH
University of Massachusetts

ALPHABETICAL INDEX BY AUTHORS' NAMES

R. C. Alexander: Comments on Johnson's paper: "On the wind-driven circulation of a stratified ocean." 87.

Sam Ben-Yaakov and I. R. Kaplan: Comments on "Redox potentials by equilibration," by W. G. Breck. 79.

W. G. Breck: A reply to Ben-Yaakov and Kaplan's "Comments on 'Redox potentials by equilibration' by W. G. Breck." 83.

P. J. Brown: Kelvin-wave reflection in a semi-infinite canal. 1.

V. T. Buchwald: On divergent shelf waves. 105.

Niels Christensen, Jr.: On free modes of oscillation of a hemispherical basin centered on the equator. 168.

Niels Christensen, Jr.: The effect of a coastal shelf on long waves in a rotating hemispherical basin. 175.

D. B. Ellis and T. C. Moore, Jr.: Calcium carbonate, opal, and quartz in Holocene Pelagic sediments and the calcite compensation level in the South Atlantic Ocean. 210.

Errata. 289.

L. D. Hansen: See Millero, Hansen, and Hoff.

E. V. Hoff: See Millero, Hansen, and Hoff.

J. A. Johnson: On the eastern-boundary conditions for a stratified ocean. 188.

I. R. Kaplan: See Ben-Yaakov and Kaplan.

E. J. Katz and R. T. Nowak: A towing system for a sensing package: experiences and plans. 63.

O. I. Mamayev: Comments on Veronis' paper, "On the properties of seawater defined by temperature, salinity, and pressure." 90.

C. C. Mei: A note on the averaged momentum balance in two-dimensional water waves. 97.

F. J. Millero, L. D. Hansen, and E. V. Hoff: The enthalpy of seawater from 0 to 30°C and from 0 to 4‰ salinity. 21.

T. C. Moore, Jr.: See Ellis and Moore.

J. E. Morrow: Oil-induced mortalities in juvenile coho and sockeye salmon. 135.

P. P. Niiler and W. S. Richardson: Seasonal variability of the Florida Current. 144.

R. T. Nowak: See Katz and Nowak.

W. S. Richardson: See Niiler and Richardson.

R. S. Scheltema: Dispersal of the protozoan *Folliculina simplex* Dons (Ciliophora, Heterotricha) throughout the North Atlantic Ocean on the shells of gastropod veliger larvae. 11.

A. H. Schooley: Wind-swept water surface in laboratory cooled by applying heat. 93.

Friedrich Schott and Jürgen Willebrand: On the determination of internal-wave directional spectra from moored instruments. 116.
Linda Smith: See Snyder and Smith.
R. L. Snyder: Covariance equations for a linear sea. 40.
R. L. Snyder and Linda Smith: On the estination of surface gravity-wave fields in the vicinity of an array of wave recorders. 51.
George Veronis: Model of world ocean circulation: 1. Wind-driven two-layer. 228.
Daniel Weils: Mechanically efficient swimming techniques for fish with negative buoyancy. 194.
Jürgen Willebrand: See Schott and Willebrand.

This Journal is normally issued in three numbers per volume per year constituting one volume. Volumes 1–18 have been published on an irregular schedule, but with Volume 19 a regular schedule has been followed. Beginning with Volume 21, the issues are appearing on 15 January, 15 May, and 15 September. All income derived from subscriptions is used solely to increase the volume and improve the quality of the Journal for the benefit of its readers. All communications should be addressed to the Editor.

All back issues are available at the following prices: Vols. 1–12, $ 3.00 per volume or $ 1.50 per number; vols. 13–16, $ 5.00 per volume or $ 2.00 per number; vols. 17–20, $ 7.00 per volume or $ 2.50 per number. Beginning with volume 21 (1963), the price is $ 15.00 per volume or $ 5.00 per number for institutions, libraries, and agents, and $ 10.00 per volume or $ 3.50 per number for individual subscribers.
